A Discovery cohort (2020-10-08, n = 85); phenylalanylphenylalanine ion retained in 82 same bin, by class
◄ 3 samples: another ion retained
(m/z 312.22 or 313.02, off scale)
313.1547
tuberculosis (n = 30)
lung cancer (n = 55)
PQN-normalized intensity
stored m/z of the retained maximum
Mann–Whitney U = 1486, p = 1.2e-09 (two-sided)
AUC = 0.90; ratio of medians = 1.90
lung cancer
(n = 55)
tuberculosis
(n = 30)
B Validation cohort (2020-11-25, n = 151); phenylalanylphenylalanine ion retained in 149 same bin, by class
◄ 2 samples: another ion retained
(m/z 312.22 or 313.02, off scale)
313.1547
tuberculosis (n = 63)
lung cancer (n = 88)
PQN-normalized intensity
stored m/z of the retained maximum
Mann–Whitney U = 4287, p = 1.1e-08 (two-sided)
AUC = 0.77; ratio of medians = 1.67
lung cancer
(n = 88)
tuberculosis
(n = 63)
